Abstract Submission

Abstract Submission Categories

- Big Data/Machine Learning/AI
- Birth defects
- Child health and development
- COVID-19 Pandemic
- Disability status
- Environment/climate change
- Fertility and fecundity
- Fetal loss/stillbirth/infant mortality
- Genetics
- Gender and sexual identity
- Global health
- Gynecological health
- Health equity
- Infectious disease
- Men's health
- Mental health
- Methods
- Molecular
- Nutrition/obesity
- Obstetric health
- Occupational
- Omics
- Paternal health
- Pharmacoepidemiology
- Pregnancy outcomes
- Policy
- Science Communication and Media
- Social determinants of health
- Substance Use
- Implementation science
- Women's health
- Violence or abuse victimization

Abstract Submission Instructions

The following rules must be adhered to precisely:

Abstracts are required to be submitted online:

In order to allow greater searching, authors will need to be added to the abstract individually as part of the abstract form and should NOT be included in the body of the abstract.

Presentation of specific data and methodologic details assist reviewers in judging the quality of the research. New findings are of greater interest than confirmation of known relations. Clarity and brevity of writing will allow evaluation of the importance of the research. Abstracts are scored by two reviewers. An overall acceptance proportion is applied to each topic category. The allocation of papers therefore represents the number of abstracts submitted from the topic areas.

General rules about abstracts:

Please read these instructions carefully. Do not include figures, tables, or mathematical equations in the abstract. The abstract should not exceed 2,000 characters, INCLUDING SPACES, but NOT including title and author information – which will be entered separately. Avoid acronyms. If you use references, provide the journal, volume, year and page numbers. Spell out abbreviations (including OR or RR) the first time you use them. If you calculate confidence intervals, specify whether they are 90%, 95%, etc. Choose a primary category and if applicable, a secondary and tertiary category from the topics listed on the abstract form. The primary category area will be used for assignment for review.

Abstracts derived from papers already published, either in print or in an online format, are not eligible for submission as an abstract.
